

OJ-VCH-HMI3

Introduction of new small OJ Drives controller

OJ Electronics is about to release a new supporting product for the DV drive product range.

The new OJ-VCH-HMI3 is a small and compact ventilation controller dedicated for the DV series.

OJ-VCH-HMI3 is built up on a 3.5 inch touchscreen panel with a user-friendly graphical user-interface, specially developed for controlling up to 32 OJ DV drives.

The VCH communicates with the connected OJ DV via a Modbus interface, ensuring easy installation.

The new OJ VCH-HMI3 comes with a silicon bumper cover to protect it against bumps, oil, dirt and drop from up to 1 meter.

The new part number is:

- OJ-VCH-HMI3-6132

Features

- Ideal for energy renovation & retrofit projects
- Controls up to 32 drives
- Intuitive menus (English & German)
- QuickPlug™ Modbus and supply installation
- Supplied from the connected DV with 24 VDC
- 3.5" colour resistive touchscreen
- Bumper cover as outer shell

Technical data

Please see the OJ homepage for more information.

Compatibility:

The OJ-VCH-HMI3-6132 is compatible with OJ DV AOC software version 2.16 or newer.

Coming into force

The OJ-VCH-HMI3-6132 is released and open for orders. Samples are available now.
