Works with

Smart features

The Lyric thermostat knows how long it takes to get your home to the right temperature, removing the guesswork and saving you money on your energy bills. Its intelligent comfort control helps maintain the desired temperature when you need it. So your home will be comfy and cosy, whatever the weather.

Programmable, adjustable, adaptable

Like an ordinary thermostat, you can program the Lyric T6 and T6R Smart thermostat to switch on and off at times that suit you. If you'd rather control it manually, you can use the thermostat on the wall, connect to the Lyric app, or control through one of our compatible smart home brands working in harmony with speech recognition assistants and devices. It will even adapt to your lifestyle, by responding to your location. Whatever you choose, you'll use less energy. Which means lower bills, and more money to spend on the things you love.

Simple to set up and easy to use

Setting up the thermostat is easy. Our app will guide you through each step, and you'll find an easy-to-follow user guide online.

Buying a Lyric T6 thermostat is quick and easy. Just visit getconnected.honeywell.com and select a retailer or find a trusted Honeywell installer to expertly fit it for you.

Works with Apple HomeKit, Amazon Alexa, Google Home and IFTTT

Apple HomeKit is a common language that smart devices can understand, support and control via Siri®, the Apple voice assistant. With Amazon Echo you can also control your home comforts using simple voice commands through its cloud-based voice service, Alexa. Google Home works in the same way thanks to its voice activated Google Assistant. With IFTTT, you can automatically link and manage your Lyric T6 Smart Thermostat by creating simple Applets. These can be turned on and off, and link multiple smart devices, giving you flexibility and infinite

possibilities. These are all efficient ways of managing your smart home, rather than using multiple apps that only do one thing.

Location Based Temperature Control (Geofencing)

When you connect your thermostat to your Lyric app, it uses your smartphone location to know where you are. It automatically knows when you're coming home and makes sure your heating is on when you arrive, turning it off when you leave again, saving you money.

Create the perfect comfort zone

EVOHOME WI-FI.

evohome Wi-Fi lets you simply and effectively control your home temperature room by room.

Number of Zones Supported	1-12
Combi Boiler Support	Yes
Opentherm Boiler Support	Yes (requires OpenTherm bridge)
Traditional Boiler Support	Yes
Stored Hot Water Support	Yes
7 Day Scheduling and Control	Yes, via app and evohome controller
Installation	Table stand or optional wall mount
Underfloor Heating (Hydronic) Support	Yes
Display	Full colour wireless display
Remote Access	Built in Wi-Fi, control remotely via Total Connect Comfort app
User Interface	Touchscreen

Smart zoning

It makes sense to only heat the parts of your home that you're actually using. With **evohome** smart zoning you can create up to 12 heating zones — including your study, kitchen and living room — allowing you to control any room within your home. So you can be comfortable in the rooms you're using, and turn the heat down in the ones you're not.

Optimise your comfort

Running late or coming home ahead of schedule? With **evohome**, you can use the Total Connect Comfort app or login via browser to turn your heating on and off, or up and down, wherever you are. **evohome** lets you set the temperature for different times of the day, for every zone, for the whole week. So it's the easy way to create a flexible heating schedule to suit your busy lifestyle.

Control and energy savings

Around 82% of home energy bills go towards heating and hot water. By using **evohome** smart zoning, you're only heating your home where you need to, when you need to. So you're always in control — and could save as much as 40%* on your energy bills.

Works with

Works with Amazon Alexa, Google Home and IFTTT

With Amazon Echo you can also control your home comforts using simple voice commands through its cloud-based voice service, Alexa. Google Home works in the same way thanks to its voice activated Google Assistant. With IFTTT, you can automatically link and manage your **evohome** by creating simple Applets. These can be turned on and off, and link multiple smart devices, giving you flexibility and infinite possibilities. These are all efficient ways of managing your smart home, rather than using multiple apps that only do one thing.

Easy to install

Thanks to the wireless design, **evohome** is flexible and can be easily set up in any home without damaging the interior. You can find a local trusted Honeywell installer through our website at getconnected.honeywell.com

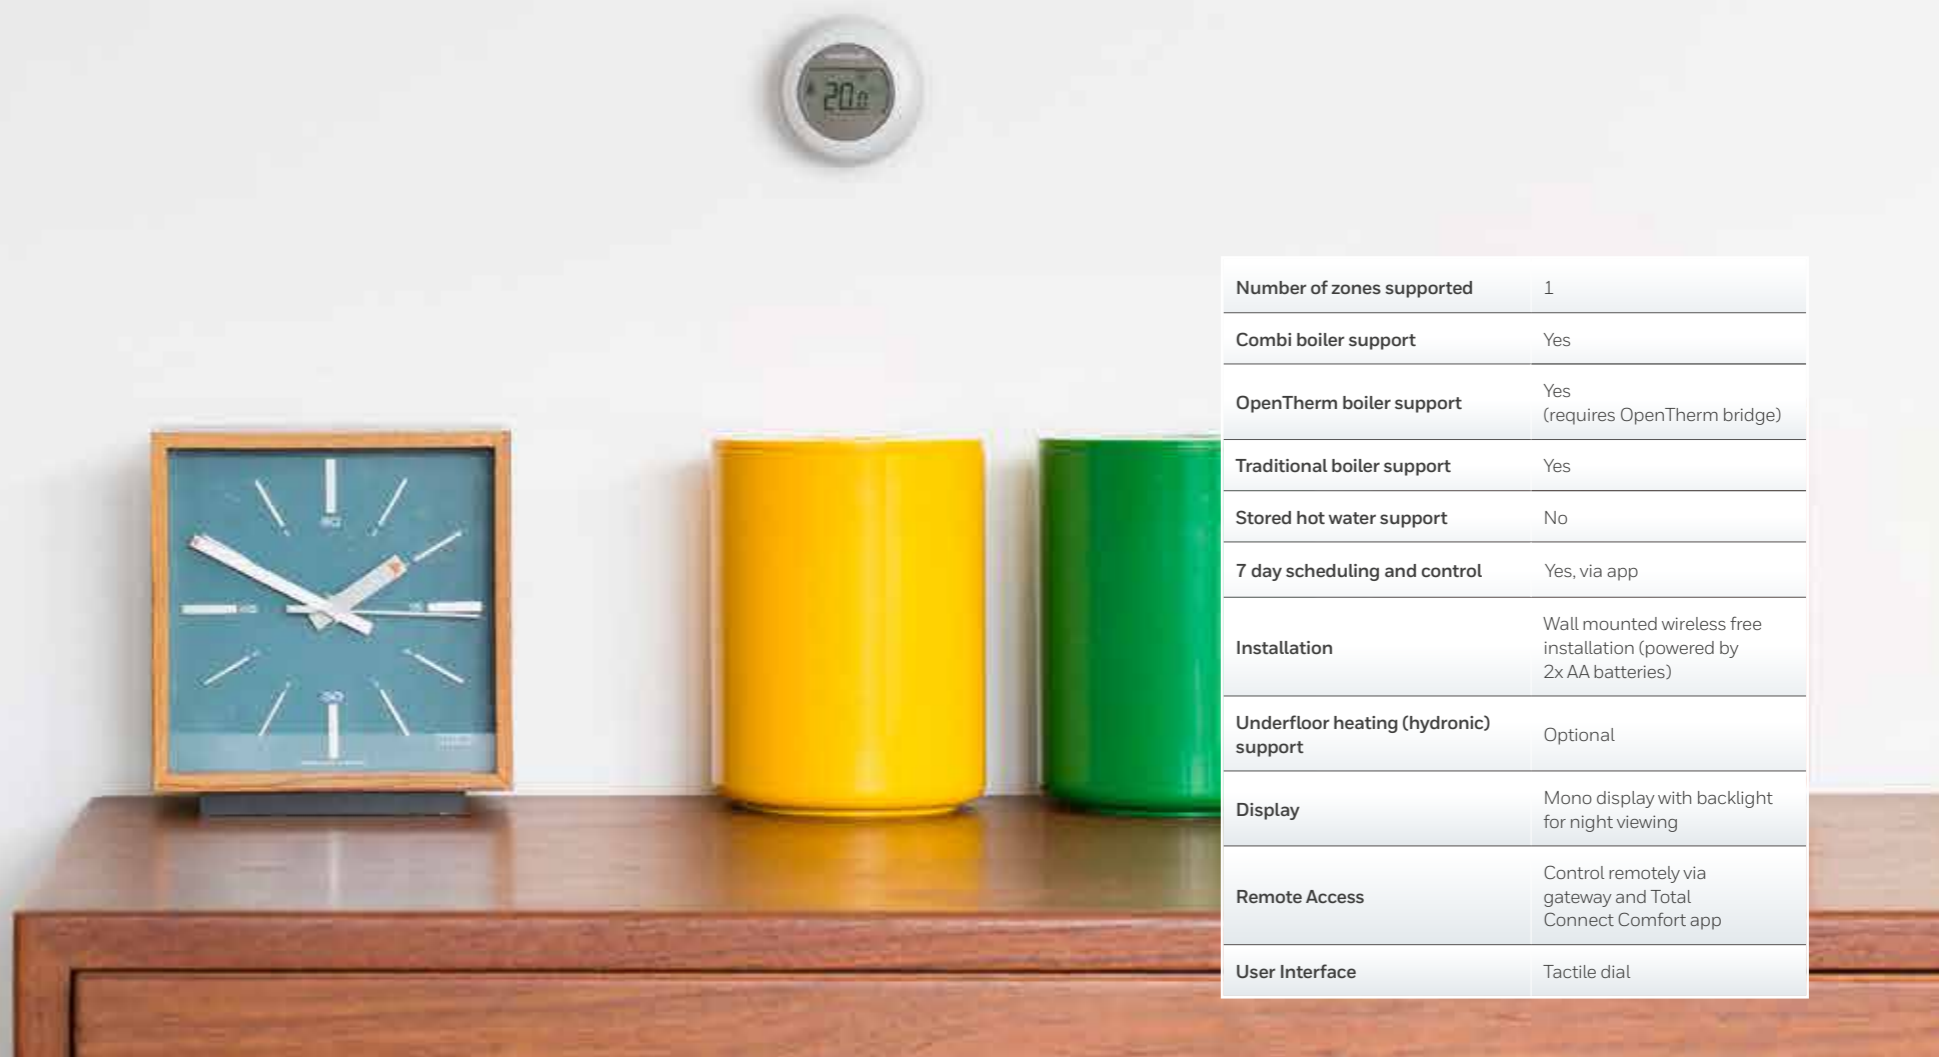

* Source Energy Saving Research Unit, Strathclyde University 2013 & TACMA 2013 — Energy savings quoted were calculated using a 3 bedroom, 2 level home, located in the UK, modelling a family of 4 over a typical week's activity, comparing an **evohome** smart zoning system, with recommended settings, to a system comprising of a simple timer, single non-programmable room thermostat and no Thermostatic radiator valves. Individual Energy savings gained are dependent upon existing controls, environment and lifestyle.

Simple, affordable heating control

SINGLE ZONE THERMOSTAT.

Single Zone Thermostat takes care of your comfort, and helps save money on your energy bills, by allowing you to control your heating schedule no matter where you are.

Number of zones supported	1
Combi boiler support	Yes
OpenTherm boiler support	Yes (requires OpenTherm bridge)
Traditional boiler support	Yes
Stored hot water support	No
7 day scheduling and control	Yes, via app
Installation	Wall mounted wireless free installation (powered by 2x AA batteries)
Underfloor heating (hydronic) support	Optional
Display	Mono display with backlight for night viewing
Remote Access	Control remotely via gateway and Total Connect Comfort app
User Interface	Tactile dial

Fits perfectly in any home

Setting up is easy – with no wires connecting your boiler and your thermostat, you can mount it on a wall anywhere in your home. Its simple dial control and backlit display mean it's super easy to use – just turn the dial clockwise to turn your heating up, and anti-clockwise to turn it down again. Its clean design fits in with any style of home décor.

Control and energy savings

Want to manage your heating when you're on the move? Simple. Just link your thermostat to a Honeywell remote gateway and you can control your home heating with our Total Connect Comfort app or login via browser – wherever you are. So your home is always comfortable and you save money on energy bills.

OpenTherm Support

Single Zone Thermostat can control the latest generation of OpenTherm boilers, ensuring precise control over your boiler temperature – helping to save you money and giving greater comfort.

Works with

Comfort to suit your schedule

As well as controlling your home comforts remotely, you can also set up a 7-day program to suit your daily needs. Simply create the desired temperature and time schedule for the week. So it's always how you like it.

Works with Amazon Alexa, Google Home and IFTTT

With Amazon Echo you can also control your home comforts using simple voice commands through its cloud-based voice service, Alexa. Google Home works in the same way thanks to its voice activated Google Assistant.

With IFTTT, you can automatically link and manage your thermostat by creating simple Applets. These can be turned on and off, and link multiple smart devices, giving you flexibility and infinite possibilities. These are all efficient ways of managing your smart home, rather than using multiple apps that only do one thing.

Smart, wireless security that keeps your home safe and secure

EVOHOME SECURITY.

evohome security connects you to your home, wherever you are. It monitors your home when you're away, with alerts and images sent to your smartphone.

Protection, now and tomorrow

evohome security works just as well in a small apartment as a large house. Because it's modular, the system is designed to suit your home and can be easily adapted as your needs change.

Plus there are no extras or add-ons with the GPRS kit — everything you need to get started is in one box, including a free two-year GPRS backup for when no internet connection is available. It's secure too, thanks to its industry-leading encryption. And with a wide range of accessories offering up to four years' battery life, evohome security provides the superior performance and peace of mind that fits perfectly with your needs.

Design your system

We know that every home is different. So evohome security is fully modular — simply choose from our range of accessories to create the right system for you. The security hub can work with up to 32 different accessories. This allows systems to be built using pet-friendly motion sensors, glass break sensors and indoor and outdoor sirens. These systems can then be controlled using contactless tags, wireless remote control key fobs or by using the Total Connect Comfort app. And if you have Honeywell **evohome** smart zoning or single zone heating, you can also control your heating within a single app.

Simple to install, easy to use

Every evohome security accessory is battery-powered, including our motion sensing camera — so the entire system is easy to install. It's also easy to use, with no codes to remember when you arm or disarm the system. Instead, wireless and contactless tags make life simple.

Security that's smart

From an intruder alert to a smoke or carbon monoxide alarm, to an open window, evohome security notifies you by text or email alerts to your phone. And with the Total Connect Comfort app, you know exactly what's happening at home. Whether you're a few miles away, or on the other side of the world, it's got safety and security covered.

Arm the system when you leave, and if you have Honeywell **evohome** smart zoning or single zone heating, it will

turn off automatically, helping to save on energy bills. You can also partially arm the system from the comfort of your bed, or let a relative into your home while you're at work. And if you get a system alert while you're away, there's no need to rush home. A camera can send you a snapshot from inside your home, letting you decide how to respond.

Always know what's going on at home

LYRIC C1 WI-FI SECURITY CAMERA.

The Lyric C1 Camera is always on when you're away from home — recording events as they happen and alerting you to unusual movements or sounds. So you can see it — and stop it.

Self-Monitored	Yes
Video Resolution	720p HD
Field of View	135° wide-angle view 5x Digital Zoom
Image Quality	1 MP
Night Vision	Up to 5m
Intelligent Sound Detection	Detects smoke/ CO alarm sounds and sends notification Y (50 dB threshold)
Motion Detection	Yes
Live Video Streaming	Yes
Adjustable Alert Zones	2 zones
Storage	24hrs free (rolling) cloud storage. Free 8GB SD Card local back-up storage
Available Modes	Home and Away
Wi-Fi Connectivity	Single band 2.4 GHz, 802.11 b/g/n
Minimum Bandwidth	1.333 Mbps
Power Supply	Input: 100-240V, 50-60Hz, Output: Micro USB 5Vdc 2A
Mounting Options	Wall or table top

Capture every moment

Our camera has a powerful 135° wide-angle live video stream and 5x digital zoom that shows what's happening in crystal-clear 720p high definition. The special night vision mode also helps you see up to five metres away, so you can enjoy superior security by capturing every moment around the clock.

Unrivalled peace of mind

The two Adjustable Alert Zones prevent false alerts. So you can choose to ignore background motion, like ceiling fans, or increase sensitivity around important areas like doors and windows. And if it does detect unusual activity, rapid notifications are sent to your smart device, so you can act straight away.

Simple to install, easy to use

Installing your camera yourself is easy, even if you're not a DIY expert. The flexible table-top or wall-mounted options mean there's no complicated wiring — just plug it in and connect it to the Lyric app. The step-by-step guide will help you through the simple set-up, so you can quickly get started.

Free secure cloud and SD card storage

The Lyric C1 camera makes it easy to check on what's been happening at home recently. Free secure cloud storage means you can stream and download clips from the past 24 hours. If there's a problem and your home Wi-Fi is unavailable there's no need to worry — you can still continue to monitor securely thanks to the free 8GB SD card. It backs up and stores your data and is encrypted for superior safety.

Geofencing and Intelligent Sound Detection

The Lyric app uses geofencing technology to track your location and enable Home and Away modes. So it automatically turns the camera on when you leave the house, then off again when you come home — meaning it's always in tune with your movements. Intelligent sound detection also recognises specific noises, like existing smoke or carbon monoxide alarms*, and sends an alert to your smart device.

*For a list of compatible alarms, see our support articles at getconnected.honeywell.com

Enhanced performance to help you see and hear more

LYRIC C2 WI-FI SECURITY CAMERA.

The Lyric C2 camera offers a range of smarter features, including enhanced picture quality and truly Intelligent Sound Detection that knows the difference between a crying baby and a smoke alarm. So you can see – and hear – more.

Self-Monitored	Yes
Video Resolution	1080p HD
Field of View	145° wide-angle view 6x Digital Zoom
Image Quality	2 MP
Night Vision	Up to 10m
Intelligent Sound Detection	Detects sound of baby crying and smoke/ CO alarm sounds and sends notification Y (20 dB threshold)
Motion Detection	Yes
Live Video Streaming	Yes
Adjustable Alert Zones	4 zones
Storage	24hrs free (rolling) cloud storage. Free 8GB SD Card local back-up storage
Available Modes	Home and Away
Wi-Fi Connectivity	Dual band 2.4 GHz, 802.11 b/g/n
Minimum Bandwidth	2.048 Mbps
Power Supply	Input: 100-240V, 50-60Hz, Output: Micro USB 5Vdc 2A
Mounting Options	Wall, ceiling or freestanding

More recognition of different sounds

The Lyric C2 camera's enhanced Intelligent Sound Detection now recognises even more sounds around your home – and can actually tell the difference between them. So it can alert you to your baby crying and also sends a separate rapid notification if compatible smoke and carbon monoxide alarms* are triggered, letting you act quickly, whatever the situation.

More security around the clock

When the sun goes down, our camera's advanced night vision mode shows you even more of what's happening, thanks to its extended 10-metre view. So if things do go bump in the night, you can enjoy more reliability, quality and peace of mind. Plus the handy two-way function lets you keep in touch, wherever you are.

More ways to see the bigger picture

The additional ceiling mounted option gives you even more flexibility to suit your home. But the improvements don't stop there. Just choose the right spot and you can enjoy a wider-angle 145° live video stream, sharper 1080p HD picture and extended zoom. You can also set up to four special Adjustable Alert Zones to increase sensitivity around important areas, like windows and doors, while ignoring background motion like ceiling fans to avoid false alerts – so you have the choice of what to monitor at home, anytime, anywhere.

More choice in tune with your movements

Like the Lyric C1 camera, geofencing on the Lyric app tracks your location to enable Home and Away modes. This automatically turns the camera on when you leave the house, then off when you come home.

What's more, you can also choose to keep it on when you're home to listen for your crying baby.

Same easy installation, storage and security

The Lyric C2 camera is just as easy to install and set up as the Lyric C1. Plus you'll still enjoy free cloud storage and can stream and download clips from the past 24 hours. The free 8GB SD card acts as back-up if your home Wi-Fi is unavailable, with all recordings protected by 256-bit encryption.

*For a list of compatible alarms, see our support articles at getconnected.honeywell.com

Peace of mind wherever you are

LYRIC W1 WI-FI WATER LEAK AND FREEZE DETECTOR.

Spot a small drop before it becomes a big problem. Leaks and frozen pipes can cause serious damage to your home. With the Lyric W1 Wi-Fi Water Leak and Freeze Detector, you'll be notified swiftly if there's a problem — so you can act quickly and avoid potential costly repairs. Whether you're relaxing at home, working in the office, or enjoying a trip away, your detector will let you know what's happening at home.

Additional Cable Sensor Accessory	1.2m
Siren Alarm	100 dBA
Battery Life	Up to 3 years w/o incident
Ingress Protection Rating	IP44
Warranty	2 years

Designed for your home

The detector can be easily placed in trouble spots wherever water could cause damage. So it's ideal for bathrooms, lofts and utility rooms, under sinks or around pipes. With a 1.2m fully sensing cable, the detector is perfect for wrapping round at-risk pipes. Additional cables can be added to cover larger areas of up to 150m.

Monitoring temperature and humidity

Built-in temperature and humidity sensors monitor your home around the clock, swiftly notifying you of any issues at home.

Receive notifications, wherever you are

Should a troublesome water leak, freeze or humidity issue be detected whilst at home, the built-in audible siren will sound so you can act fast. Your detector can also be monitored remotely using the Lyric app with notifications sent directly to your smart device, keeping you informed wherever you are. If you're away, family and friends can be notified too — meaning you can quickly take action.

Simple to set up

No complex guides or menus. No separate hubs or power cables. Installation just takes a few minutes thanks to the quick-start step-by-step guide. Your detector even comes complete with three AA batteries, which last up to three years. Everything you need is all one box — just connect it with your Wi-Fi and you're ready to go.

Get started with the Lyric app

The detector is easy to set up and use via the Lyric app. Compatible with Android and iOS, you'll be swiftly notified on your smart device.

Works with

This can be set up for multiple smartphones and tablets, keeping you and the family informed. So, whatever smart device you choose, you'll know what's happening at home.

Works with IFTTT

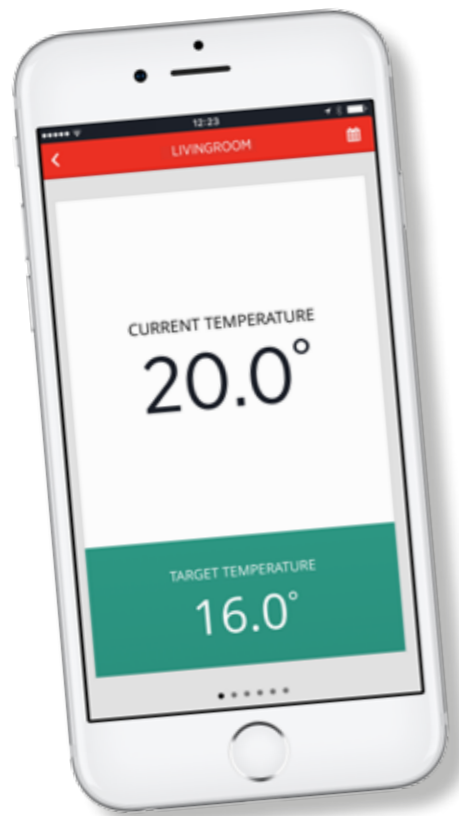

Not only can you be notified of any leaks or freezing issues in your home via the audible alarm or notifications on your smart device — you can now create your own alert through the IFTTT app too. Linked with other smart home devices, why not set up your smart lighting to change colour when a leak or freeze is detected? When the lights turn blue, you know to take action.

Stay in control
wherever you are

GET CONNECTED.

Smarter homes are connected homes – better control, more comfort and security, and bigger energy savings. Our Lyric and Total Connect Comfort apps allow you to use your smartphone to monitor and control your home heating and security – any time, anywhere.

Total Connect Comfort app

Total Connect Comfort brings you the peace of mind you need, knowing your home is safe, secure and under control, making it easy to manage multiple thermostats and security devices across many locations – for the whole family.

evohome Wi-Fi and Single Zone Thermostats

- Control your heating from anywhere with your smartphone or tablet
- View and change your temperature settings and heating schedule
- Activate quick actions and system modes
- See the current outdoor temperature and 5-day forecast

evohome security

- Arm, disarm, or check to see what's happening inside your home
- Get text or email alerts sent to your phone
- Automatic snapshots sent when the camera's motion sensor is triggered
- Arm the system and if you have evohome smart zoning or the Single Zone Thermostat, your heating will turn itself off automatically

CONNECTING WITH OTHER SMART BRANDS.

People all over the world have been taking comfort in Honeywell technology for more than 100 years.

We know the range of connected home products is growing every day, so at Honeywell we're working with other leading smart brands to join up our thinking and make sure our solutions work together now and in the future.

With our connected products, your home comforts are taken care of – the simple, intuitive way. Your home is your own – and your Honeywell connected home is designed to adapt and grow with you, day to day and year to year. Apps and services that integrate with Honeywell products will further enhance the comfort, safety and convenience of your Honeywell home, now and in the future.

Look for the Works with Honeywell logo to see if your favourite products connect with ours. We're compatible with several of today's leading brands, with more on the way every day. It's the simplest way to a smarter home.

Apple HomeKit

Apple HomeKit is a common language that smart devices from any manufacturer can understand and support then control via Siri, Apple's voice assistant. It's a single way of managing everything – from heating, to lights, sensors and more – using just one app. So, even if you add new HomeKit-enabled devices in the future, it will work with those you already own. Meaning it adapts to you and can easily expand as your needs change.

Apple Watch

Now compatible with the Apple Watch, you can control your Lyric T6 thermostat with the Lyric App, wherever you are. Interact with your thermostat quickly and easily from home or away, and control the temperature in your home, at any time.

Amazon Echo & Alexa

Amazon Echo uses voice commands, taking your connected home to another level. With its cloud-based voice service, Alexa, you can control your thermostat and other smart devices from one wireless speaker – now, and in the future.

Google Home

The Lyric T6, evohome Wi-Fi and Single Zone Thermostats all connect seamlessly to Google Home and its voice activated Google Assistant, so you can set the perfect temperature using simple voice commands. Just get started with 'Ok Google.'

IFTTT

The Lyric T6, **evohome** Wi-Fi, and Single Zone thermostats work with IFTTT, allowing you to automate your home's heating around you and your life – in real time. The water leak detector also works with IFTTT so you can be notified of any troublesome leaks while you're away from home.
